Lahore, Pakistan | daniyaljamil2005@gmail.com | linkedin.com/in/daniyal-jamil-060b66261 | github.com/Daniyal-Jamil-2005

PROFESSIONAL SUMMARY

DevOps- and cloud-focused developer with hands-on experience in Python, Linux, Docker, Git, and cloud platforms including AWS and GCP. Built and deployed SkillSync, an AWS-based SaaS platform that reached the semi-finals of the AWS 10,000 AI Ideas competition. Experienced across APIs, databases, containerization, and automation, with a growing focus on CI/CD, container orchestration, and scalable infrastructure.

EXPERIENCE

Backend Engineer Intern — FlyRank AI

Remote | June 2026 – September 2026

- Built AI-driven capstone projects end-to-end, developing practical fluency across modern AI development tools and workflows.
- Developed an embeddable widget and lead-capture platform for integration into third-party sites.
- Built an AI image understanding and content-matching engine to automate visual data classification.

Technical Lead — OWASP Bahria University Chapter

Bahria University, Lahore | Sep 2023 – Present

- Developed and maintained the chapter's web presence using React and modern frontend tooling, building community pages and event listings.
- Organized technical workshops and hands-on sessions attended by 100+ students; connected industry professionals for mentorship and knowledge sharing.
- Coordinated with faculty to embed security principles and software best practices into student projects and chapter events.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Cloud & DevOps: AWS, GCP, Docker, Linux, Git, GitHub Actions, Jenkins, CI/CD, Kubernetes (basics)

Backend: Django, FastAPI, REST APIs | **Frontend:** React.js, HTML5, Tailwind CSS

Databases: PostgreSQL, Neo4j

PROJECTS

SkillSync — AI-Powered Workforce Orchestration Platform

github.com/Daniyal-Jamil-2005/Skill-Sync | daniyal-jamil-2005.github.io/Skill-Sync

- Designed a multi-tenant SaaS platform on AWS (Lambda, DynamoDB, Cognito, API Gateway, CloudFormation) that matches employees to tasks and balances team workloads.
- Built 5+ serverless microservices in Node.js and a React/TypeScript frontend across employee and admin portals; semi-finalist, AWS 10,000 AI Ideas competition.

CIRO — Multi-Agent Crisis Intelligence Platform

github.com/Daniyal-Jamil-2005/CIRO

- Built a real-time disaster-monitoring system with a 4-stage autonomous Python agent pipeline (Flask) deployed on GCP, syncing to a Flutter mobile app and React web dashboard via Firestore.
- Regional Finalist, AISeekho2026 Antigravity Hackathon (Google for Developers x Telenor x MoITT).

Inbox Copilot — AI Email Intelligence Pipeline

github.com/Daniyal-Jamil-2005/Inbox_Copilot

- Built a FastAPI backend that scans, categorizes, and scores inbox opportunities using LLMs, TF-IDF, and calibrated logistic regression, with MySQL and Neo4j for relational and graph data.
- Shipped a React analytics dashboard with skill-gap visualizations and automated PDF reporting; competed at SOFTEC'26 AI Hackathon.

Reddit's Feelings — Sentiment Consensus Engine

github.com/Daniyal-Jamil-2005/Reddit-s-Feelings | reddits-feelings.streamlit.app

- Built and deployed a live Streamlit web app that scores public sentiment on any topic in real time, weighting Reddit discussions by upvotes and comments into a 0-100 consensus score.
- Used PRAW for read-only Reddit API access and NLTK/VADER for sentiment scoring, with N-gram mining to surface key community themes.

EDUCATION

B.Sc. Computer Science — Bahria University, Lahore

Aug 2023 – Present

CERTIFICATIONS

- Tools of the Trade: Linux & SQL — Google
- Claude with Amazon Bedrock — Anthropic
- Software Engineering Virtual Experience Program — Skyscanner
